Hands On Project #2

1. First I put my header with an image

```
118  ∨  <body>
119  ∨      <header style="padding: 1px;">
120             <img src="http://www.sbp.ph/assets/images/fiba-world-cup-2023-banner-blue.
                png"
121             alt="image-of-banner" height="100%" width="100%">
```

```
7   ∨      <style>
8   ∨          * {
9                  box-sizing: border-box;
10             }
11  ∨          header{
12                 height: 18rem;
13                 width: 100%;
14                 padding: 10px;
15             }
```

2. In my aside I encoded these codes

```
123         <main>
124             <div class="parent-main">
125                 <aside style="font-style: italic; font-family: 'Gill Sans', 'Gill Sans
                    MT', Calibri, 'Trebuchet MS', sans-serif; font-size: 25px;">
126                     <p><a href="#" id="Button-one" style="color: ▪antiquewhite;">Home</
                        a></p>
127                     <p><a href="#" style="color: ▪antiquewhite;">Games</p>
128                     <p><a href="#" style="color: ▪antiquewhite;">News</a></p>
129                     <p><a href="#" style="color: ▪antiquewhite;">Brackets</a></p>
130                 </aside>
```

With links and used this style

```
27  ∨          aside{
28                 width: 20vh;
29                 height: 66vh;
30                 margin-top: 10px;
31                 background-color: ▪#e81414;
32                 display: flex;
33                 flex-direction: column;
34                 justify-content: center;
35                 align-items: center;
36                 border-radius: 11px;
37                 color: ▪antiquewhite;
38             }
```

3. Then divided the hero in 2 parts then divided the first part in two using div and class of upper-section, container-img and upper img

```
131              <div class="parent-sections">
132                  <section class="upper-section">
133                      <div class="container-img">
134                          <div class="upper-img">
135                              <p>Key Players of the Week</p>
136                          </div>
137                          <div class="img-div">
138                              <img src="https://cdn.nba.com/headshots/nba/latest/
                                 1040x760/1629029.png" alt="image-of-luka" height="22%"
                                 width="22%">
139                              <img src="https://cdn.nba.com/headshots/nba/latest/
                                 1040x760/203903.png" alt="image-of-tower"
                                 class="img-bottom" height="21%" width="21%">
140                          </div>
141                      </div>
142                      <div class="container-table">
```

I encoded these styles for the parent main, parent sections and the upper and lower sections.

```
39          .parent-main{
40              display: flex
41          }
42          .parent-sections{
43              width: 100%;
44              margin-top: 10px;
45              margin-left: 5px;
46              background-color:  #efe81d;
47              border-radius: 11px;
48              padding: 10px;
49          }
50          .upper-section{
51              display: flex;
52              background-color:  #1854d7;
53              border-radius: 11px;
54              padding: 10px;
55          }
56          .lower-section{
57              border: 1px solid  #1854d7;
58              background-color:  #1854d7;
59              padding: 10px;
60              border-radius: 11px;
61          }
```

```
56 ∨         .lower-section{
57               border: 1px solid ■#1854d7;
58               background-color: ■#1854d7;
59               padding: 10px;
60               border-radius: 11px;
61           }
62 ∨         .upper-section,.lower-section{
63
64               width: 98%;
65               height: 32vh;
66               margin: 2px;
67           }
68 ∨         .lower-div {
69               border: 1px solid ■antiquewhite;
70               width: 98%;
71               height: 9vh;
72               margin: 5px;
73               background-color: ■antiquewhite;
74               border-radius: 11px;
```

4. Then I put the table as class of container-table

```
142                          <div class="container-table">
143                              <table>
144                                  <table style="text-align: center;" class="center1">
145                                      <thead style=" background-color: ■#e81414;">
146                                          <th style="color: ■whitesmoke;">Top Performers</
                                             th>
147                                          <th style="color: ■whitesmoke;">GP</th>
148                                          <th style="color: ■whitesmoke;">MPG</th>
149                                          <th style="color: ■whitesmoke;">PPG</th>
150                                          <th style="color: ■whitesmoke;">Points</th>
151                                      </thead>
152                                  </thead>
153                                  <tbody>
154                                      <tr style="background-color: ■white;">
155                                          <td>Luka Doncic</td>
156                                          <td>7</td>
157                                          <td>31.4</td>
158                                          <td>26.7</td>
159                                          <td>187</td>
```

```
161                                        <tr class="tcolor">
162                                            <td>Jordan Clarkson</td>
163                                            <td>5</td>
164                                            <td>35.9</td>
165                                            <td>26.0</td>
166                                            <td>130</td>
167                                        </tr>
168                                        <tr style="background-color: ■white;">
169                                            <td>Lauri Markkanen</td>
170                                            <td>5</td>
171                                            <td>26.7</td>
172                                            <td>24.8</td>
173                                            <td>124</td>
174                                        </tr>
175                                        <tr class="tcolor">
176                                            <td>Karl-Anthony Towns</td>
177                                            <td>5</td>
178                                            <td>29.6</td>
179                                            <td>24.4</td>
180                                            <td>122</td>
181                                        </tr>
182                                    </tbody>
183                                </table>
184                            </div>
185                        </section>
```

Also used these codes for the 2 images and the style of the table

```
76          .container-img{
77              width: 35%;
78              margin: 2px;
79          }
80          .container-table{
81              width: 75%;
82              margin: 1px;
83              background-color: ■gray;
84              border-radius: 11px;
85          }
86          .upper-img{
87              border: 1px solid ■antiquewhite;
88              height: 5rem;
89              margin: 2px;
90              background-color: ■antiquewhite;
91              display: flex;
92              align-items: center;
93              justify-content: center;
94          }
95          .img-div{
96              display: flex;
97              flex-direction: column;
98              margin: 1px;
99              margin-left: 5px;
100
101          }
102          .img-bottom{
103              align-self: flex-end;
104              margin-right: 5px;
105          }
```

```
106        table {
107            width: 100%;
108            Border-collapse: collapse;
109            font-family: 'Gill Sans', 'Gill Sans MT', 'Calibri', 'Trebuchet MS',
                   sans-serif;
110            border-radius: 11px;
111        }
112        tr, td, th {
113            width: 23%;
114            padding: 11px;
115        }
```

5. Then this is the other section the lower part

```
186 ∨                    <section class="lower-section">
187 ∨                        <div class="lower-div">
188
189                        </div>
190 ∨                        <div class="lower-div">
191
192                        </div>
193 ∨                        <div class="lower-div">
194
195                        </div>
196                    </section>
197                </div>
198            </div>
199        </main>
```

6. Lastly for the footer

```
200        <footer style="text-align: center;color: ■white; font-family: 'verdana',
               sans-serif;font-size: 20px;">
201            <img src="https://upload.wikimedia.org/wikipedia/en/thumb/4/47/
               International_Basketball_Federation_logo.svg/
               1200px-International_Basketball_Federation_logo.svg.png"
202            alt="image-of-fiba" height="100%" width="13%"><i>Hands on Project by Rafael
               Antonio M. Larracas</i>
203    </body>
204    </html>
205
```

With these codes for style

```
16        footer{
17            height: 6rem;
18            width: 100%;
19            margin-top: 8px;
20            background-color: □#030303;
21            padding: 10px;
22            border-radius: 11px;
23            display: flex;
24            justify-content: center;
25            align-items: center;
26        }
```

7. I've had a hard time in this hands on 2 almost in all and really in the spacing, padding, radius margins height and width for them to be in perfect place. I didn't finish my edits because I

thought I have more time this weekend but I was wrong. Well the important parts are there and I'm proud I finished it regarding the edits XD

Output:

Key Players of the Week

Top Performers	GP	MPG	PPG	Points
Luka Doncic	7	31.4	26.7	187
Jordan Clarkson	5	35.9	26.0	130
Lauri Markkanen	5	26.7	24.8	124
Karl-Anthony Towns	5	29.6	24.4	122
